```

**If you see the items in reponse, some of the keys are missing in items that should have been added in GET API, that was the task.**

Keys/Attributes Missing in item-1

```
"fundingInfo": {
  "latestRoundInfo": Object,
  "investorInfo": Object
},
```

Keys/Attributes Missing in item-2

```
"description": {
  "long": String
},
"profileLinks": {
  "linkedIn": String,
  "twitter": String
},
```

Make code flexible enough that if some keys are being added/removed later, the code should adapt those things.
